## EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard Beck on October 4, 2004.

Claim 1 is amended to read as follows:

1. A PEM fuel cell which comprises at least two terminal plates which clamp a membrane which, apart from the outermost edge, is covered on both sides by an electrode layer, the covering of the membrane with at least one electrode layer projecting into the structural edge region of the fuel cell, product water in the structural edge region of the fuel cell for wetting the membrane, and seals on opposite sides of the membrane in the edge region arranged between the membrane and the terminal plates, wherein the seals stop with the membrane and the product water is between the seal and the membrane.

## **DETAILED ACTION**

### ***Allowable Subject Matter***

2. Claims 1, 4 and 5 are allowed.
3. The following is an examiner's statement of reasons for allowance: The Prior Art does not disclose product water between the seal and membrane in the structural edge used for wetting the cell membrane or that a reservoir is on each side of the membrane between the seal and membrane and that product water is within both reservoirs which is used for wetting the cell membrane.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
